

BWEA27
18-20 October 2005
Cardiff International Arena

Join us at the BWEA's 27th annual conference for the first
COWRIE seminar
19TH October 2005, 14:00 – 17:30

This first COWRIE-sponsored environmental research seminar will provide an update on COWRIE research into the environmental impacts of offshore wind energy developments, including:

- The COWRIE environmental work programme Data and Information Management, and the latest findings from studies into:
 - Predicting the displacement of common scoter due to offshore windfarms
 - The interactions of electromagnetic fields generated by offshore windfarm cables
 - Latest developments on underwater noise and vibration project
- Associated work programmes presented by invited speakers include update on RAG projects and progress reports on navigation studies

Please note that there is no entry fee for this event. Registered seminar participants will also be provided with afternoon tea and access to the BWEA exhibition.

If you would like to attend this seminar, please register your name, organisation and address with Chloe Delgery at cowrie@naturebureau.co.uk no later than 14th October.

There is a separate registration and fee for the main BWEA conference (including lunches). For more information, please visit www.bwea.com/27/

Please circulate this announcement to any colleagues who may be interested in this event.
